EXPERIENCE

Learn Arena @ Director of Engineering learnarena.com

 July 2022 to Present  Remote  NextJS, Typescript, Python

- Competitive learning platform that pays you to learn.
- Founding developer, scaled from React/Firebase app to NextJS/MySQL.
- Built an AI-driven course creator, generating 60 hours of content from a single topic phrase.

Marketplacer @ Software Engineer www.marketplacer.com

 April 2022 to May 2023  Remote  Ruby on Rails

- Central developer on the 'Connected' platform, central dashboard allowing enterprises to manage fleets of Shopify and Adobe Commerce sites.
- Strict TDD ensured comprehensive test coverage for new features.

Izoox @ Software Developer www.izoox.com

 October 2018 to March 2022  Longmont, CO  PHP, Ruby on Rails

- Managed and developed projects for clients from small businesses to enterprises.
- Built scalable APIs for major clients like Rug Doctor and developed sites for brands like Blue Hawaiian Helicopters.

NOTABLE PROJECTS

Python Markdownify Python

github.com/matthewwithanm/python-markdownify/pull/162 

- Improved performance by 40x of most popular Python markdown translator.
- Package is used on over 10k+ projects including many notable Microsoft projects

Blue Hawaiian PHP, Laravel www.bluehawaiian.com

- Co-developed feature-rich website for Hawaii's largest helicopter tour company.
- Designed a dynamic weights and balances system to automate safe seating assignments; a simplified version is published on my GitHub.

LawSnipe Rust, Vue, Tauri lawsnipe.com

- Started as a project for D.O.G.E
- Allows users to search the entirety of federal law using any AI model of your choosing.
- Desktop application on Windows, Mac and Linux
- Plans to include all state law and case law.
